# Accelerate SAP Data Intelligence

**Your data is a key digital business asset.**

The amount of data stored globally is expected to grow to 8.9 zettabytes by 2024.[1] Get more value from your data with the artificial intelligence (AI) and machine learning (ML) capabilities in SAP® Data Intelligence.

**Top benefits from machine learning[2]**

| Benefit | Value |
|---|---|
| Lower costs | 34% |
| Improved workforce productivity | 30% |
| Increased sales | 30% |
| Improved business agility | 29% |
| New and improved products | 26% |
| Enhanced customer service | 26% |
| Reduced risk exposure | 22% |
| Empowered internal decision makers | 20% |
| Improved regulatory compliance | 19% |

## Red Hat and Intel offer a high-performance hybrid cloud foundation for SAP Data Intelligence to help you maximize the value of your data.

With long-standing relationships with SAP, Red Hat and Intel build complete, certified AI and analytics solutions that deliver innovation, performance, and efficiency.
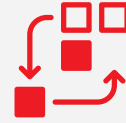

## Promote intelligent decision making across your organization.

Speed analytics operations with built-in accelerators.

Deploy AI, ML, and analytics tools easily.

Build assets once and deploy them anywhere.

## Gain easier, unified data access to help users work more effectively.

Create scalable storage pools.

Simplify access to data sources.

Build high-performance data pipelines.

Use your preferred tools.

## Support innovation while maintaining critical security.
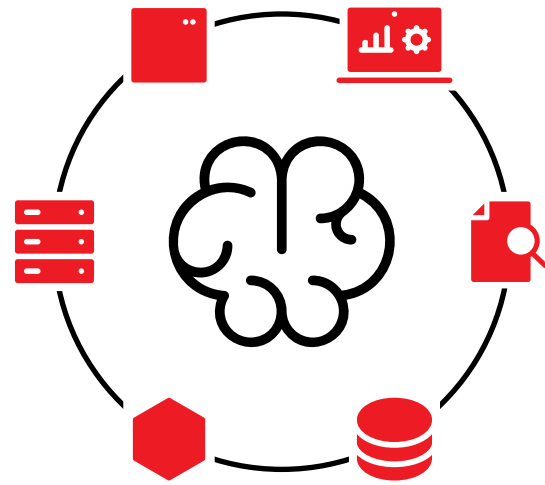

Adopt DevOps approaches more easily.

Take advantage of advanced hardware capabilities.

Isolate processes and control resources.

## Predict future trends in business operations and customer behavior.

- Build AI into your business applications.
- Analyze large amounts of customer data.
- Adapt your offerings to data trends.

## Get more from your data with Red Hat, Intel, and SAP.
