

Ignite new careers in IT

Develop the next generation of IT professionals

The Information Technology (IT) field is growing fast

Think of how often the technology we interact with changes daily. With IT reaching across nearly every industry, the number of IT jobs rises to keep up with future innovations.

3.6 million
tech job openings in 2021¹

8.9 million
projected number of net tech employment by 2022¹

93%
of hiring managers report they struggle to find talent with open source skills²

A career in IT typically offers:

Variety of potential roles and **job opportunities**.

Excitement of a **fast-paced** industry.

Plenty of growth opportunities.

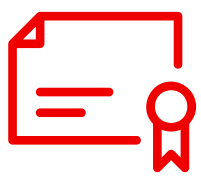

Higher salaries.

125% higher median tech wage compared to the overall median national wage³

At Wake Tech Community College

30%

of students had no technical experience when starting

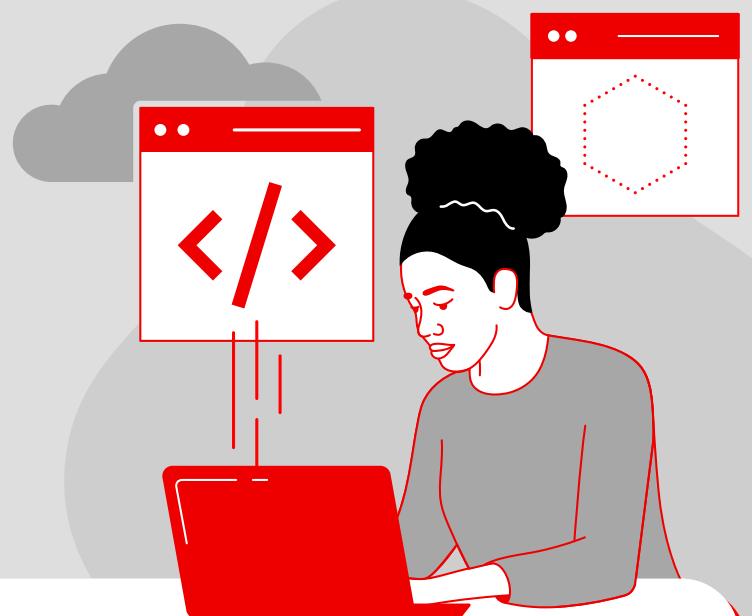

What you'll learn

The skills required for entry-level Linux® careers and the appropriate certifications.

// "When we hear student after student say the same things, feel the same way, and find success, this tells me one thing—that Red Hat [training] is working."

Rhiannon Holley
Instructor, Systems Security & Analysis,
Fayetteville Technical Community College

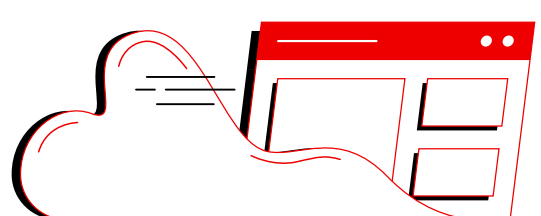

Get started today

The Red Hat workforce development program helps professionals change careers and students enter the IT industry with certifications. Prepare the next generation of tech experts without the time commitment or expense of a four-year degree program.
